

Setting Your Default Browser to a Supported Browser

These instructions will guide you through how to confirm you are using a modern browser as your default browser and if required, change your default browser

1. Click the **Start** button

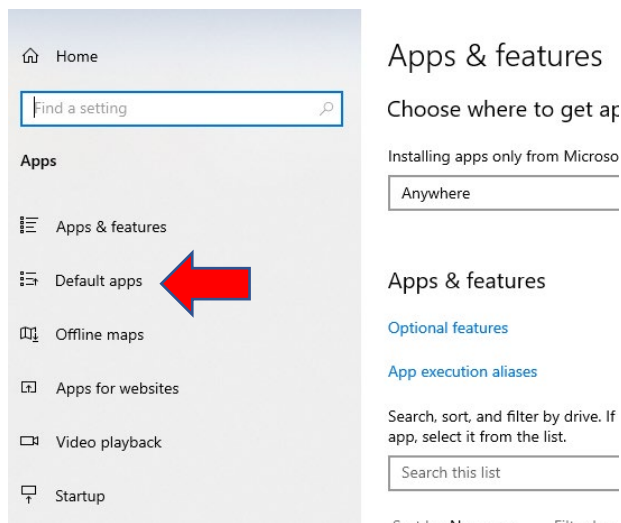

2. Click the **Settings** icon

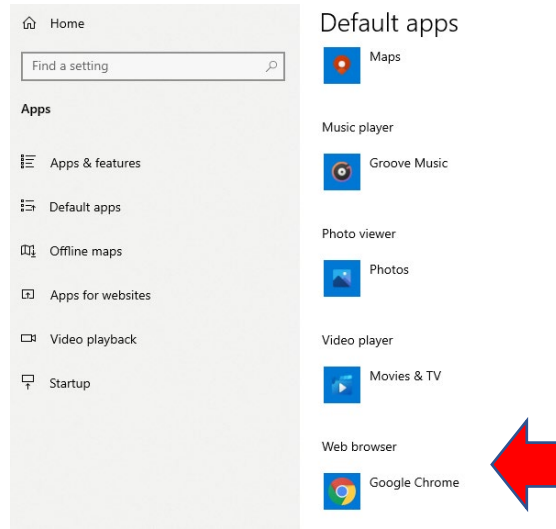

3. In Windows Settings, click **Apps**

4. In the left pane of the Apps & Features window, click **Default apps**

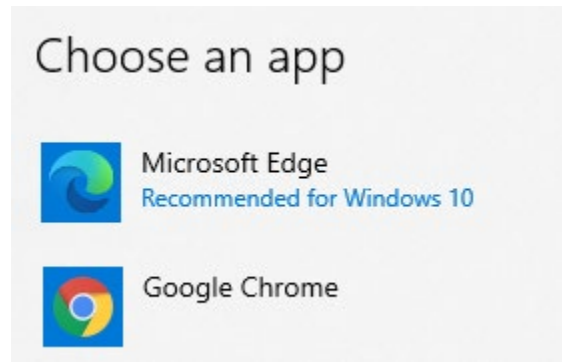

5. Scroll down in the list Default Apps to **Web Browser**.

6. Confirm it is set to **one** of the supported modern browsers

Supported Modern Browser	Retired/Unsupported Browsers
